Industrial Zone

MINH HUNG PET

Minh Hung Industry and Trade Co., Ltd was established in 1999 with more than 12 million USD investment. The factory is located in an area of 12,000m² with 300 employees. The factory specializes in manufacturing all kinds of PET bottle, supplying the domestic and export markets.

From the early days of establishment, the factory has constantly invested in modern lines and machines to create the highest quality products with the most beautiful designs.

Minh Hung's PET bottle products are produced by a closed process with the production line imported from many countries around the world: Systems embryogenesis, dehumidified system and automatic feeding from Japan; Mixing system, automatic color quantification from the Netherlands; Bottle molds from German, Korea, Vietnam; Systems to manufacture accessories from Taiwan, Korea, Japan.

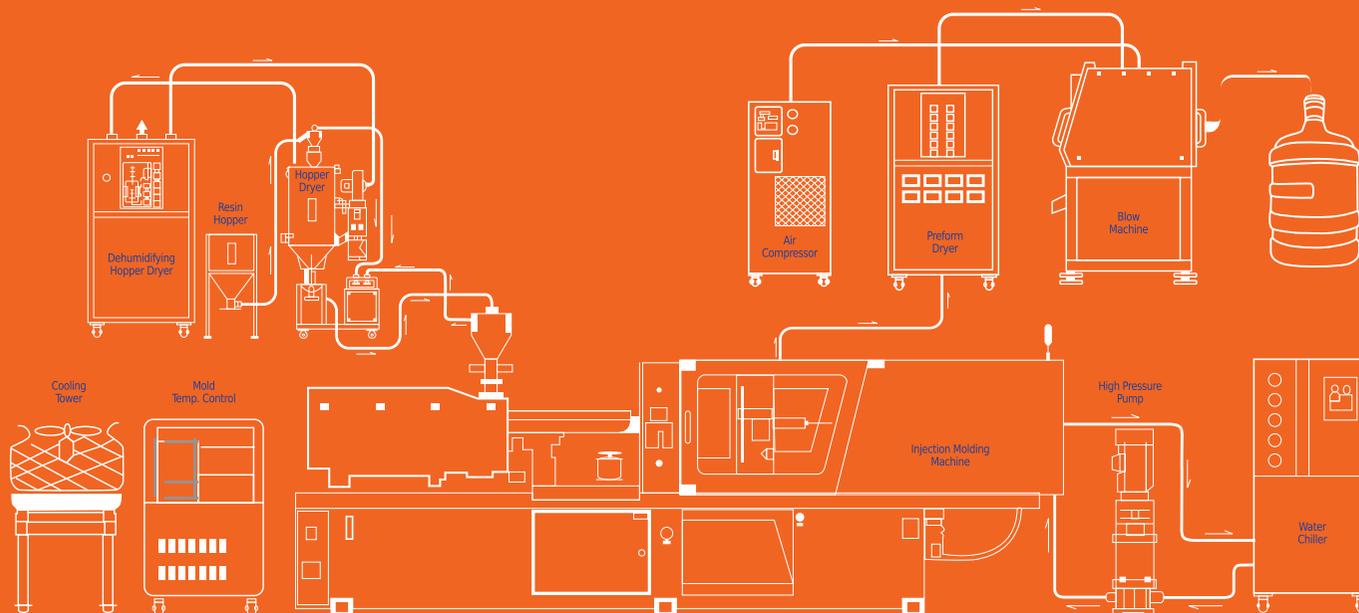

With the current advanced PET bottle production technology line, Minh Hung produces many good, beautiful and unique bottles; Typical is the Queen PET bottle (the 20L-21L bottle which is easy to stack and has a very convenient carrying strap), this model is an exclusive product of Minh Hung, manufactured by advanced molds imported from Germany. All products of the factory are manufactured by the virgin resins from SK - Korea, Nanya - Taiwan, Thai PET - Thailand, Sumitomo - Japan. Minh Hung is among the factories using the biggest quantity of PET plastic in Vietnam.

In terms of equipment, the factory is equipped with 20 machines with the capacity of 2,500 bottles/machine/day for 20-30 liter bottles, 10 machines with the capacity of 6,000 bottles/machine/day for 5-10 liter bottles, 20 machines of different kinds to manufacture accessories, like lid, handle, faucet. With the above scale, Minh Hung can well meet the demand of PET bottles for export and domestic markets for drinking water, cooking oil and sauce industries.

In May 2009 with a large investment in modern machinery equipment and new technology and thanks to the dedication and creativity of many staffs, Minh Hung Group was able to make a machine to successfully manufacture a new product from PET plastic, a type of plastic suitable for pharmaceutical and food industries: tanks with large volume which can contain from 300 to 2000 liters. This is the new generation tub product line which is the first available in the world. The birth of Minh Hung PET tank is an event marking 10 years of success, 10 years of continuous development, the result and pride of Minh Hung Group's members, distributors and agents.

After nearly 25 years of operation and development, Minh Hung is a leading PET bottle manufacturer in Vietnam and its products have been being exported to Canada, Malaysia, Thailand, Cambodia, and Laos.

MODERN PRODUCTION TECHNOLOGY LINE

“ Minh Hung Group has its own professional mechanical factory, which is constantly studying and testing to make new product, manufacturing or improving machinery and equipment as well as improving production technology in line with new industry standards of PET industry; This allows the company to hold many proprietary technology manufacturing know-hows, the capabilities of making unique mold and machinery for the purpose of creating PET products with modern designs, suitable for many various consumer needs. ”

Blow Machine

Transfer of PET blowing technology

Based on the world's advanced PET packaging production technology, Minh Hung continuously improves and builds new production machines for itself with innovative and breakthrough thinking.

PET bottles are produced through 2 stages: Firstly, virgin PET resin, color masterbatch and some additives will be fed to the injection molding machine (No. 1) to create preforms; Secondly, the preforms will be put into the preform dryer (No. 2) for warming up before being put into the blower (no. 4) to blow up PET bottles or tanks.

Especially since 2020, Minh Hung has successfully built an automatic PET bottle blowing machine (5-30L) to export the machine to foreign countries.

In particular, Minh Hung is willing to transfer technology so that customers can produce PET bottles or tanks by themselves. Customers only need to invest in a preform dryer (No. 2), an air compressor (No. 3) and a blower (No. 4) to reduce costs and Minh Hung will provide the preforms so that customers can produce the finished products with their own designs.

Product PET

Each PET product produced by Minh Hung is based on the criteria of creating a breakthrough to make a difference.

Based on the world's advanced PET packaging production technology, Minh Hung continuously improves and manufactures new machinery and equipment to produce PET bottles and tanks with innovative and breakthrough thinking.
